

MOTA-ENGI INFORMS ABOUT THE SIGNING OF A CONTRACT IN PORTUGAL AMOUNTING TO APPROXIMATELY €200 MILLION

Mota-Engil, S.G.P.S., S.A. (“MOTA-ENGI”) hereby informs that, through its subsidiary MOTA ENGI ENGENHARIA E CONSTRUÇÃO, S.A., it has entered into a new contract with CALB (Europe), S.A. in the amount of €207.3 million, concerning the construction of Phase 1 of the “New Sines Gigafactory”, located in Sines, Portugal.

The aforementioned contract, with an estimated duration of 22 months, encompasses an intervention area of approximately 17 hectares and a construction area of around 62,000 square metres. The project includes the development of several facilities, namely workshops, a voltage reduction station, a building associated with the integrated power plant, a chemical storage area, an NMP storage area, a solid waste treatment unit, a waste collection station, a wastewater treatment unit, and gatehouses. Accordingly, the scope of services to be provided includes the construction of building structures, execution of specialised installations, installation of various factory equipment, as well as the implementation of secondary cabling systems for certain equipment.

With the award of this contract, MOTA ENGI ENGENHARIA E CONSTRUÇÃO, S.A. further strengthens its backlog in Portugal, contributing to the positioning of both Portugal and the Group as key players in the development and execution of sustainable and digital transformation projects.
